

Easy Installation Guide

SOX+

◆ Before Getting Started

Thank you for purchasing SOX+. This product contains two CDs. Please use the CDs while following the instructions below to install SOX+.

1. Installing iGrafx

To install iGrafx FlowCharter, use the **iGrafx** CD-ROM (*CD labeled as **Enable Process Excellence.**). Please skip to "**2. Installing SOX+**", if iGrafx has been already installed.

◆ Installation Procedures

- ① Insert the **iGrafx** CD-ROM into your CD-ROM drive. Wait until **Windows Installer** starts.
*Execute [**setup.exe**] on the CD if the installer screen does not automatically appear, or right-click on the CD-ROM drive and click [**Play (P)**] command.
- ② Follow the instructions on the installer screen.
- ③ Enter the 24 digits license key into the **Licensing Information** screen of the installer.
The license key is found at the line of **License Key** on the **iGrafx Licensing Certificate** (labeled as **Product Description: iGrafx FlowCharter – Desktop Client v17 Perpetual License**).
*The capital letters and the small letters are not distinguished. Also, hyphens are not necessarily required to enter.
- ④ Select **Typical** on the **Select Installation Type** screen.
*If you want to specify the directory to be installed, and/or you do not want to install shape collections, select **Custom**.
- ⑤ The installation process begins.
- ⑥ Click the **Finish** button as the following message appears on the screen: **iGrafx has been successfully installed.**
- ⑦ Point to **Windows Start** menu- **All Programs**, and confirm **iGrafx** is registered on the list.
- ⑧ Remove the **iGrafx** CD-ROM from CD-ROM drive.

2. Installing SOX+

After completing to install **iGrafx FlowCharter**, use **SOX+** CD-ROM to install **SOX+**.

◆ Installation Procedures

- ① Insert the **SOX+** CD-ROM into your CD-ROM drive.
*Execute [**Autorun.exe**] on the CD if the installer screen does not automatically appear, or right-click on the CD-ROM drive and click [**Play (P)**] command.
- ② **SOX+ Integrated installer** screen appears. Follow the instructions below to select the software.

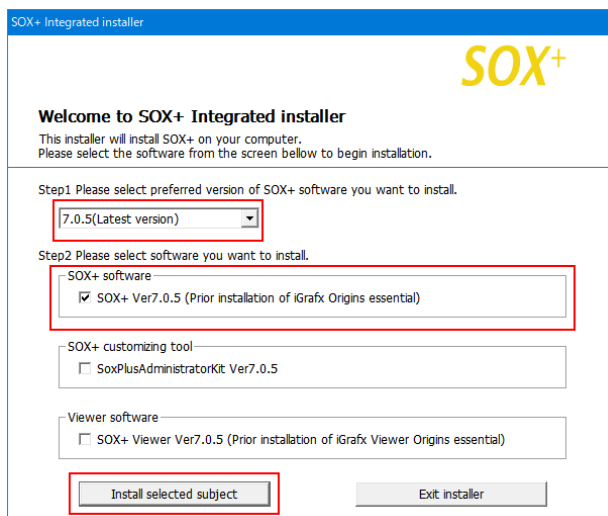

Step1. Please select preferred version of SOX+ software you want to install.

Select a version of SOX+ to install. Usually, select "**7.0.5 (Latest version)**".

Step2. Please select software you want to install.

Select the software to install.

Check "**SOX+ Ver 7.0.5**" under "**SOX+ software**".

- ③ Then, click the **Install selected subject** button.
SOX+ Integrated installer result screen appears. Confirm the selected items and click **Install** button
- ④ **SOX+ InstallShield Wizard** screen appears. Follow the instructions.
- ⑤ Enter 16 digits license key into the **SOX+ License Key** page.
The license key is found at the line of **SOX+ License Key** on the **SPS Licensing Certificate** (labeled as Product Description: SOX+ License).
*The capital letters and the small letters ARE distinguished at the **SOX+ License Key** page.
- ⑥ Installation process starts by clicking the **Install** button.
- ⑦ Click the **Finish** button as the following message appears on the screen: **InstallationShield Wizard Completed**.
SOX+ Integrated installer result screen appears. Click **Finish** to exit the installer.

3. Installing SoxPlusAdministratorKit

SoxPlusAdministratorKit is installed from **SOX+** CD-ROM (*CD labeled as **SOX+**). Also, the software can be installed with SOX+ at once.

iGrafX software is not required to be installed in order to install SoxPlusAdministratorKit. However, it is highly recommended to install SoxPlusAdministratorKit into a computer in which SOX+ is already installed.

◆ Installation Procedures

- ① Insert the **SOX+** CD-ROM into your CD-ROM drive.
*Execute [**Autorun.exe**] on the CD if the installer screen does not automatically appear, or right-click on the CD-ROM drive and click [**Play (P)**] command.

- ② **SOX+ Integrated installer** screen appears.

Step1. Please select preferred version of SOX+ software you want to install.

Select same version as SOX+.

Step2. Please select software you want to install.

Check "**Install SoxPlusAdministratorKit Ver7.0.5**" under "**SOX+ customizing tool**".

Then, click the **Install selected subject** button.

- ③ **SOX+ Integrated installer result** screen appears. Confirm the selected items and click **Install** button.
- ④ Click the **Next** button on the **Welcome** screen.
- ⑤ Read the license agreement carefully and click to select "I accept the terms in the license agreement" on the **License Agreement** screen. Click the **Next** button.
- ⑥ Enter the 16 digits license key into the **Installation Information** screen of the installer.
The license key is found at the line of **Admin License Key** on **SPS Licensing Certificate** (labeled as Product Description: SOX+ License).
- ⑦ Change the current destination folder on the Destination Folder screen when needed, and the click the **Next** button.
- ⑧ Installation process starts by clicking the **Install** button.
- ⑨ Click the **Finish** button as the following message appears on the screen: **InstallationShield Wizard Completed.**
SOX+ Integrated installer result screen appears. Click **Finish** to exit the installer.

4. Installing SOX+ Viewer (nonfree option)

To install **SOX+ Viewer**, follow the same steps as the installation of **SOX+**. Install **iGrafx Viewer** from **iGrafx** CD-ROM first, and install **SOX+ Viewer** from **SOX+** CD-ROM.

To install **iGrafx Viewer**, install iGrafx without entering the License Key. To install **SOX+ Viewer**, the License Key (nonfree option) is required.

iGrafx Viewer enables to browse flowcharts only. To browse SOX+ dialog or execute RCM, the installation of **SOX+ Viewer** is required.

5. Notes for Installation

- Isolated installation screens for individual products may be shown underneath the integrated installer screen during the installation. If the integrated installed screen remains over the others and the active screen cannot be seen, your computer may appear to stop responding. In this case, go to the Task bar to confirm the screen of the installation currently in process.
- In some conditions, it may take a long time to install Microsoft .NET Framework.

6. Confirming the Completion of the SOX+ Installation

To start iGrafx FlowCharter, point to **All Programs** on the Windows **Start** menu and click **iGrafx**. When the installation procedures have been successfully completed, the **SOX+** menu has been added to the menu bar.

7. Add Design/Operating Evaluation Option License Key (nonfree option)

Design/Operating Evaluation Option is optional function for SOX+. To use the Design/Operating Evaluation Option, click the **SOX+** menu and open the **SOX+ Version Info**, then click the Design/Operating Evaluation Option button and add the license key. After restarting the iGrafx tool, the Design/Operating Evaluation Option menu will be added in the SOX+ menu.

◆ Updating from the earlier version

Users can customize user setting of the new version to achieve equivalent conditions to the earlier version. Please refer to the following link for more information on differences between the earlier and new versions and how to transfer the user settings.

To remove SOX+ Add-on, follow the steps noted below.

This procedure deletes only SOX+ while iGrafx FlowCharter is NOT removed.

◆ Uninstalling SOX+

- Open **Control Panel** on the **Start** menu and select **Programs**.
- Go to **Uninstall a program** to select **SOX+**, and click **Uninstall** button. Click **Yes** on the confirmation screen.
- After completing the uninstallation, the following message appears when you start iGrafx FlowCharter:
The extension project XXXXXXXXXX could not be loaded. Click **OK** button.
- Open **Visual Basic- Extension Project** on the **Tool** menu, and remove "EngSOX-Sol.flx".
